- Being a member of the National Elites Foundation of the Islamic Republic of Iran
- Earning the first rank of Fars Province Wushu Champion
- Earning the second rank of Wushu Champion in-country (Iran)

About

I was born in Jul 1993 and I'd been interested in programming since I was 15, therefore I chose computer science in high school and studied programming courses like PHP, JavaScript, and HTML. In my early 20's I started learning Java and Android programming and I released several apps on the Cafebazaar also I worked as a freelancer. My first teamwork experience was in a startup named MySecure and after a while, I went to military service. After finishing the military service I started to work as a freelancer again. But I've liked to learn more and more so I decided to work remotely for a Californian company called Opege. In that company, I developed apps for restaurants. But personally, I've liked to have more challenges so I moved to another company named Pulsyno and I developed a medicine-app there. After a while, I decided to work in a bigger company. At that time I got a good job offer from an e-commerce company named Esam, and I started working there. Still, I like to work in more professional and powerful teams to solve more challenging tasks.

WORK EXPERIENCE

HomeDish at New Zealand (Senior Android Developer – remote)

Jan 2021 to present

- Order food online Application
