Hamidreza Etebarian

React Native Developer & UI/UX Designer

PROFILE

I started programming in 2010 with C++ and Java. Then, I became interested in making apps for Android. Mesghal is one of my apps that is developed in 2013 and that is one of most-popular financial apps. A Framework that helps developers called MeowFramework is another of my projects. Also in last 10 years ago, I worked in 30+ projects as Android Developer. Since 2019, I've migrated to React Native technology to develop apps for Android and iOS.
