Full-time

Tadbir Salamat Marham - PezeshKet

Product and Technical Development Manager, Tehran, Tehran

09/2019 - 06/2021

Part-time

A good idea made us turn our experiences in the company on the line into a big super brand in a new collection , It was a fresh start again .

This new experience, which coincided with the arrival of the Corona virus COVID19, made me have a million user experiences again after iGap messenger .

Kian-Iranian smart technologies development Group

Technical Adviser, Tehran, Tehran Province

09/2018 - 03/2019

Part-time

After giving the iGap messenger to Kian-Iranian company, I was working part time and consulting in partnership with the company for the full transfer of technology over the course of six months.
I'm glad to see my little kid (iGap), see every day as it grows.

PARSDADE Corporation

Co Founder & CEO, Najafabad, Isfahan Province

03/2008 - 04/2019

Full-time

To register a new domain and lunch a new website was my dream in zenith technology days so i decided and run this company namely PARSDADE Corporation . This company aimed to offer web services (register domain and web hosting), and web design and to update itself with the latest technology . Nowadays in Iran, PARSDADE Corporation is a company for offering suitable web services and is one of the veterans in this realm . The days we cooperated with companies such as SagoNet , FortressITX and CaroNet were the most memorable memories in 2008-2009

hostiran.net

Foreign Exchange Coordinator & Technical Support, Tehran, Tehran Province

01/2014 - 01/2015

Full-time

The only thing that I should mention is a memorable period of time when I met helpful and creative colleagues in the company where I was responsible as foreign exchange coordinator & technical support specialist in the company .

Research Center of Iranian Parliament (Majlis)

IT Consultant, Tehran, Tehran Province

01/2011 - 01/2014

Full-time

Sepanta Communications Najafabad

Co Founder & Technical Director, Najafabad, Isfahan Province

01/2010 - 01/2011

Full-time

As I have had experiences in companies where offered internet service ,to found a company was really my passion therefore based on my previous experiences and my studies I founded this company as the agency of Sepanta company. New wireless technology for long distance and frequencies like 3.2 GHz and 5.8 GHz were the examples of projects we worked on.

I could not forget those days when we used the character, crazy frog , to brand the company and I went up and down the sixty-height-towers over and over to setup wireless dishes .

SabaTile Company

IT Consultant, Isfahan, Isfahan Province

09/2009 - 02/2010

Part-time

I have worked as an IT Consultant for 6 months in SabaTile Company where produced ceramic and tiles in Esfahan , and i helped the company to set up the site and improved the IT section.

Novin Fekran Yegane Ravesh (Nafir)

Senior Technical Director, Najafabad, Isfahan Province

01/2005 - 01/2006

Full-time

The company had several different departments and i worked in internet service department

Story :

Those days the most popular way to connect the internet was dial up connection which people used it , buying hourly internet cards which had a username and password, hearing the ding-dong sound which notified you are connected to internet were one of the most memorable memories those days.

One of the latest communicative technology was wireless one which was offered with 2.4 GHz in Iran.

I was among people who used this service for the first time in the company and never forget the senao devices like 2611 and 3500.

Meghdad internet cafe

Technical Director, Najafabad, Isfahan Province

01/2004 - 01/2005

Full-time

Internet cafe is somewhere like coffee shop where you don't drink coffee, instead people can pay to use the internet (net) which was one of the most popular jobs in Iran those days.

Minor skills

- Working with Big Data on PostgreSQL and Couchbase Databases , working on more than 10 terabytes of Data and Sharding at Postgre was a completely different and great experience in the field, which was lovely and interesting.
- Working with Linux Fedora family and setting up all the requirements of the services needed since 2006 is with me.
- Working with Cpanel, DirectAdmin, Installing Mail Server and Web Services, and Securing It for all my personal projects was a habit for me.

Also, I have been working with the following services on projects of these many years, including my Minor skills :

(Experience has been every bit as high as a commercial product and is not easy to test!)

1. **Minio** is an open source object storage server with Amazon S3 compatible API.
2. **RabbitMQ** is an open-source message-broker software that originally implemented the Advanced Message Queuing Protocol (AMQP).
3. **Citus** is distributes data & queries across nodes so PostgreSQL database .
4. **Couchbase** is a NoSQL database (originally referring to non SQL, non relational or not only SQL).
5. **NGINX** accelerates content and application delivery, improves security, facilitates availability and scalability for the busiest web sites on the Internet.
6. **Bash scripting** is an extremely useful and powerful part of system administration and development.
7. **VMware ESXi** is a bare metal hypervisor that installs easily on to your server and partitions it into multiple virtual machines.
8. **VMware vSAN** aggregates local or direct-attached data storage devices to create a single storage pool shared across all hosts in the vSAN cluster
9. **Ceph** is a unified, distributed storage system designed for excellent performance, reliability and scalability.
